# SC794 - RCBus 80-pin Z80 RomWBW & SCM Computer Kit

This modular computer can run RomWBW, which includes a very good implementation of CP/M, and also the Small Computer Monitor (SCM).

Both firmware options can be installed at the same time as the memory module has two sockets for FLASH memory chips. A toggle switch selects the firmware to be used. Self-adhesive labels for the FLASH ROMs can be found beneath the ROMs (between the ROM and the conductive foam).

SC794 is made from the following kits:

SC730 - Z80 CPU plus MMU

SC721 - Memory, 512kB + 2x512kB

SC716 - Z80 SIO serial

SC719 - Compact Flash

Plus one of these options:

SC701 - Backplane, 6+1, 5 volt power

SC709 - Backplane, 11+1, 5 volt power

SC702 - Backplane plus SC703 PSU

SC710 - Backplane plus SC703 PSU

You need to supply your own Compact Flash card and a suitable power source.
