

SC691 - RCBus 40-pin Z80 RomWBW & SCM Computer Kit

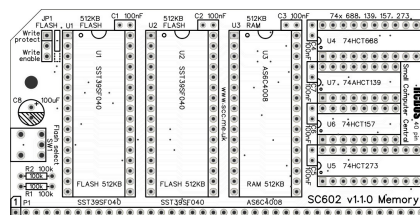

This modular computer can run RomWBW, which includes a very good implementation of CP/M, and also the Small Computer Monitor (SCM).

Both firmware options can be installed at the same time as the memory module has two sockets for FLASH memory chips. A toggle or slide switch selects the firmware to be used. Self-adhesive labels for the FLASH ROMs can be found beneath the ROMs (between the ROM and the conductive foam).

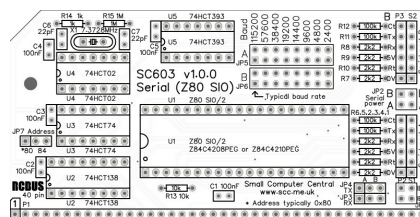

SC691 is made from the following kits:

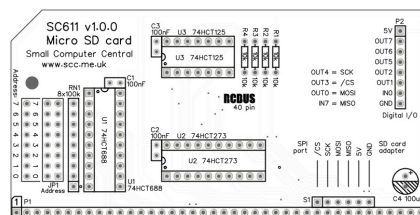

SC601 - Z80 CPU

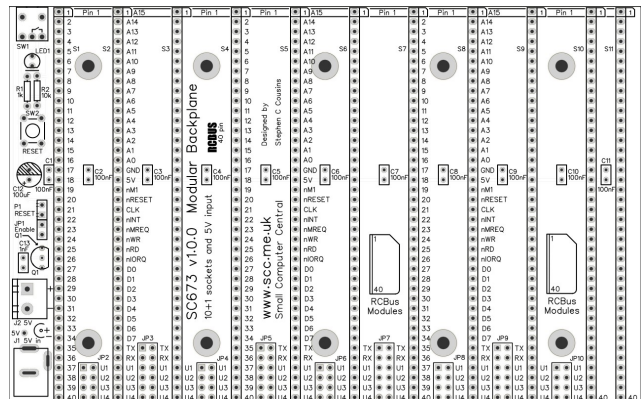

SC602 - Memory, 512kB + 2x512kB

SC603 - Z80 SIO/2 dual serial

SC611 - MicroSD card storage with adapter

SC673 - Backplane 10+1 with 5 volt power input

USB cable
A to mini-B
50 cm

Optional extras

Serial to USB adapter

Adapter cable, 6-way, 20 cm

You need to supply your own MicroSD card and a suitable power source.

Assembly instructions and user guides can be found here:
